

# M. SHARJEEL ABBAS

Software Engineer | Full-Stack Developer | AI Solutions

Islamabad, Pakistan | +92 315-0551700 | sharjeelraja089@gmail.com | linkedin.com/in/sharjeel-raja

## PROFESSIONAL SUMMARY

Software Engineering graduate and full-stack developer with hands-on experience building AI-integrated, cloud-based SaaS applications using the MERN stack. Skilled in prompt engineering and generative AI integration (OpenAI and Gemini APIs), with practical exposure to ERP systems, role-based access control, and Agile delivery. Combines strong front-end and back-end fundamentals with applied AI knowledge to design scalable, secure, and user-focused software. Seeking a Full-Stack Developer or AI Engineer role to build impactful, production-ready products.

## TECHNICAL SKILLS

- Languages: JavaScript, Python, Java, C++, HTML, CSS
- Frameworks & Tools: React.js, Node.js, MongoDB, Firebase, Git, VS Code, Android Studio
- AI & Generative Tools: OpenAI API, Gemini API, ChatGPT, Claude, Lovable AI, Prompt Engineering
- Prompt Engineering Framework: Task, Context, References, Evaluate, Iterate (TCREI)
- Concepts: Full-Stack (MERN) Development, SaaS Architecture, RBAC & Secure Authentication, Agile/SDLC, Microsoft Dynamics 365

## PROFESSIONAL EXPERIENCE

### Full Stack Developer — Devsynx

May 2026 – Jul 2026

Islamabad, Pakistan

- Developed and maintained full-stack web features using modern JavaScript frameworks, contributing to both client-facing UI and server-side logic.
- Collaborated with cross-functional teams in an Agile environment to deliver functional, tested code within sprint timelines.
- Applied version control (Git) and code review best practices to maintain code quality across the codebase.

### AI Intern — Innovista Pvt Limited

Jul 2025 – Oct 2025

Islamabad, Pakistan

- Led the development and implementation of an AI-powered ERP software solution for internal business operations.
- Applied prompt engineering techniques to streamline workflows across Finance, Accounts, and Human Resources modules.
- Gained hands-on experience translating business requirements into AI-driven features, collaborating with cross-departmental stakeholders.

### Volunteer — READ Foundation

Feb 2025 – Mar 2025

Islamabad, Pakistan | Education-focused nonprofit for orphaned children

- Assisted in planning and organizing community service and outreach projects.
- Supported the team with administrative coordination and technical tasks.

## FINAL YEAR PROJECT

### SynergyFlow ERP — AI-Enabled SaaS-Based Enterprise Resource Planning System

- Designed and developed a cloud-based, multi-tenant SaaS ERP system for SMEs using the MERN stack.
- Built core modules for HR, Finance, Team Management, and Project Management.
- Engineered an AI Resume Analyzer that automatically shortlists candidates by matching resumes against job descriptions.
- Integrated a secure AI chatbot using OpenAI and Gemini APIs to handle business-related queries.
- Implemented role-based access control (RBAC) and used MongoDB for scalable, secure NoSQL data storage.
- Delivered the project iteratively using Agile methodology, from requirements through testing.

## ADDITIONAL PROJECTS

- Traffic Flow Simulation — Built a cellular automata-based Python simulation to model vehicle flow dynamics.
- AI Quest Explore — Developed a prompt-engineered, no-code AI website.
- Café & Coffee App — Built a native Android ordering application using Android Studio.

## EDUCATION

Bachelor of Science, Software Engineering — Capital University of Science & Technology, Islamabad 2022 – 2026

Intermediate, Pre-Engineering — Army Public School (APSACS)

2019 – 2021

Matriculation — Army Public School (APSACS)

2017 – 2019

## CERTIFICATIONS & LANGUAGES

- Certification: Prompt Engineering (By Google) | Languages: English (Fluent), Urdu (Native), Punjabi (Fluent)
